To Whom It May Concern

I am writing this letter with regards to the point to point CTP Green slip proposed reforms.

At the moment there are a number of inconsistancies with regards to all point to point services, the most obvious being the taxi/hire versus the ridesharing market

Currently the CTP greenslip to ensure a taxi is in excess of $8500 dollars whilst a ridesharing vehicle does not need to have a business CTP Greenslip. Essential all vehicles that provide a point to point service whether this be a taxi, hire car, shuttle buses, ridesharing need to be paying a one standard rate and this should be able to be legally enforced and I believe that there needs to be consequences for those that do not adhere to this. The inconsistency of it all is just unfair, that there are one rule for some and another rule for others

Thank you for your time regarding this submission
