Subject: Re Feedback regarding proposed AHP appointments

Dear SIRA,

I have read the information provided by email regarding proposed non-treating AHP and IMC appointments.

I agree with the proposed appointment and regulatory frameworks that have been provided.

I note that SIRA mentions that training will obviously be an integral part of the process, and I would suggest that a training program specific to each specialty should be a mandatory requirement of appointment to ensure high standard decision making and ongoing gaining of expertise in understanding the new system.

I have no comment or feedback to provide with respect to IMC appointments as this lies outside my field of expertise.

Kind regards,

Dr Joe Scoppa
