The premiums for Greenslips in this state are nothing short of Daylight Robbery. 19% profit is just outrageous in this day and age, especially for something which is compulsory. For people like me (self-funded retiree) it is a dreadful burden, WE only get 2.7% on our savings which we have to live on. After saving NOT to be a burden on the government all our lives, the imposition of the Greenslip premiums PLUS your other fees and taxes is just a rip-off. This particular insurance should perhaps be run by the government (just think of the profits you could make) Maybe, if you did run it you could lower some of your other outrageous taxes e.g. Stamp duty. Ordinary people are simply fed up with being ripped off by big business and even our own government. Around the world they are waking up and implementing change e.g. Brexit and the recent elections in the USA. It would be an opportunity, by lowering taxes, premiums etc, to show that you really are listening to the people. Regards, [REDACTED]
