

To Whom it May Concern

In October 2016, we had to renew the registration for our car, a 2001 Toyota Hilux Dual Cab Ute and were totally shocked to find that our Compulsory Third Party Green Slip has risen from \$724.39 in 2015 to \$940.90 in 2016 – equating to whopping 30% rise over the 2015 price!!!!!!

Our Green Slip is with GIO and shopping around for a better price resulted in a wasted effort and more disappointment. My research into Green Slip prices did however, uncover a NSW Government Media Release dated 29 June 2016 detailing a proposal to overhaul CTP Insurance.

I welcome any reform because there is no way any company can justify a 30% increase in premiums. We have owned our car since new and have had 15 years of faultless driving without making any insurance claim.

The cost of Green Slips is nothing more than a blatant attempt to gouge more revenue from the poor NSW motorists. Good drivers like my wife and I are therefore being penalised for the bad driving of others.

With interest I look forward to the new reforms and would be pleased to be updated on your progress.

Thank you,

Murray Newham
