#### Effectiveness

System effectiveness in protecting workers and getting workers back to work and wellbeing

### Reportable claims

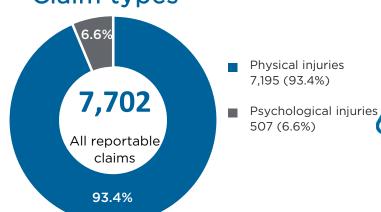

7,160

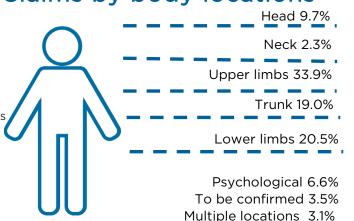

**JANUARY** 2019

7,163

### Claim types

### Claims by body locations

Systemic locations 1.4%

<sup>1</sup>For the 2018/19 financial year

7,702

January 2020 report

#### Effectiveness

Workers' claims journey results at January 2020

#### Monthly average over the last 12 months

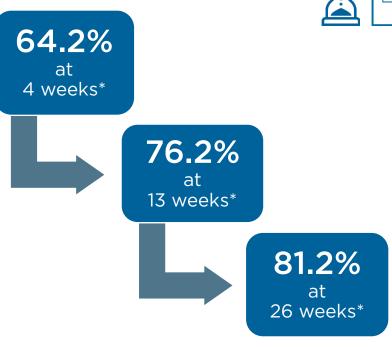

<sup>&</sup>lt;sup>T</sup> Lost time is based on workers receiving weekly benefits.

### Return to work

**Note:** SIRA identified data quality issues with the accuracy and completeness of return to work data submitted by the Nominal Insurer (NI). The data appears to indicate a significant deterioration in the NI's RTW performance. SIRA instructed the NI to improve the quality of the data. To address both the data quality and performance concerns with the NI, SIRA carried out a data quality audit in December 2018 and completed a Compliance and Performance Review in December 2019

\* Based on a rolling 12-month cohort, for further details see the Explanatory Note.

<sup>^</sup> Figure is based on a 12-month average.

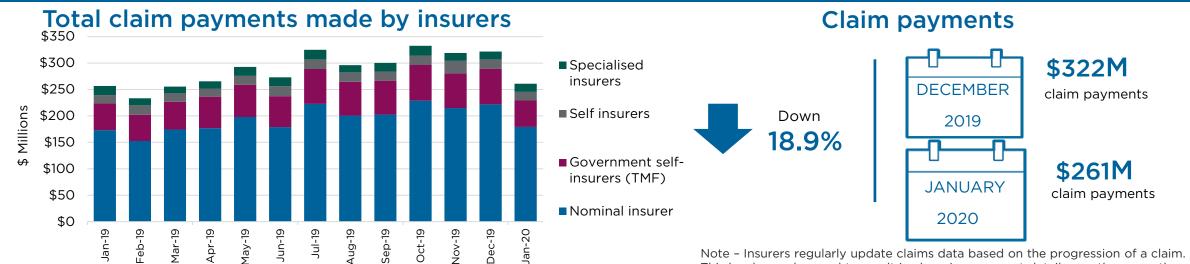

January 2020 report

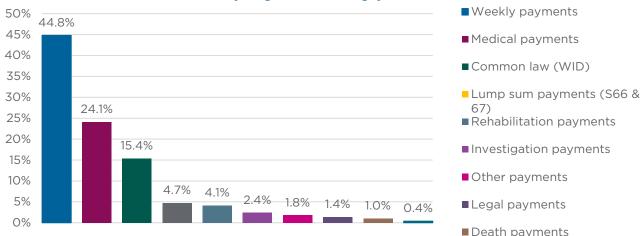

### Efficiency & viability

Efficient system delivery, sustainability, and viability of the system for generations to come

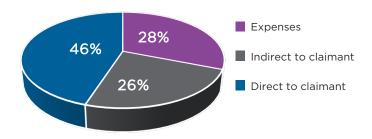

### Benefits paid to and for workers

as a percentage of total claims expenditure (2018/19)

This has been observed to result in changing payment details month on month.

**Note:** The benefits paid to and for workers is calculated annually. Details of definitions can be found in the methodology and data section. Insurers reported this data to SIRA at the end of the 2018/19 financial year.

January 2020 report

### Customer experience & equity

Customers' experience with the system is positive and equitable

#### **Enquiries and complaints**

**Note:** These are the complaints and enquiries numbers received by SIRA and WIRO. Complaint data (which may include the name of an insurer) is derived from verbatim reports from customers. While SIRA does some data cleansing, the reporting is verbatim from customers and might occasionally reference an incorrect insurer and/or insurer type.

Disputes lodged

0.5% of active claims

#### Perceived justice of the compensation process

Insurer type	Procedural Justice Average (mean) on a 5-point scale	Informational Justice Average (mean) on a 5-point scale	Interpersonal Justice Average (mean) on a 5-point scale	
Nominal Insurer	4.0	3.9	4.3	
Self and Specialised	3.9	3.9	4.3	
Treasury Managed Fund	4.0	3.7	4.4	

Definitions of dimensions used to measure customers perception of equity and perceived justice:

- Procedural justice, about the fairness of the procedures used to determine the outcomes.
- Informational justice, is about receiving accurate and timely information about the rationale for decisions.
- Interpersonal justice, relates to whether workers were treated with respect and sensitivity.
